

Project Initialization and Planning Phase

Date	1 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

The example shows a customer problem statement template with five colored boxes representing different parts of the statement:

- I am** (Blue box): A customer applying for a credit card.
- I'm trying to** (Orange box): Get my credit card application approved.
- But** (Pink box): I am unsure whether I meet the bank's eligibility criteria.
- Because** (Yellow box): My approval depends on factors such as income, employment status, credit history, and existing financial obligations.
- Which makes me feel** (Dark Blue box): Anxious and uncertain about the approval decision.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A bank credit analyst.	Predict whether a credit card application should be approved or rejected.	Manual evaluation takes significant time and effort.	Thousands of applications must be assessed using income, employment, credit history, loan balance, and other financial details, increasing the chance of human error.	Confident that an intelligent prediction system would help me make faster and more accurate decisions.
