

Demonstration of Proposed Features

Date	3 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document presents the key features proposed for the Credit Card Approval Prediction Using Machine Learning project and records whether each feature was successfully implemented and demonstrated. It serves as evidence of the successful development, testing, and demonstration of the proposed solution by the developer.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Data Preprocessing	Cleaned the dataset by handling missing values, removing inconsistencies, encoding categorical features, and scaling numerical data.	Implemented	Yes	Successfully completed.
2	Machine Learning Model Training	Trained and compared Logistic Regression, Decision Tree, Random Forest, and XGBoost algorithms.	Implemented	Yes	All models were evaluated successfully.
3	Best Model Selection	Selected the best-performing model based on evaluation metrics such as Accuracy, Precision, Recall, and F1-Score.	Implemented	Yes	Best model saved for prediction.
4	Credit Card Approval Prediction	Predicted whether a credit card application is Approved or Rejected using the trained machine learning model.	Implemented	Yes	Predictions generated successfully.
5	Flask Web Application	Developed a web-based interface for users to enter applicant details and receive prediction results.	Implemented	Yes	Application runs successfully using Flask.
6	Model Deployment Preparation	Organized project files, documentation, trained models, and deployment resources for submission and future deployment.	Implemented	Yes	Project prepared for deployment.

Feature Implementation Summary:

Total Features Proposed	6
-------------------------	---

Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
