

Communication

Date	3 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Communication Plan:

Effective communication was maintained throughout the development of the Credit Card Approval Prediction Using Machine Learning project. Regular interactions with the project guide, progress reviews, issue resolution, and documentation updates helped ensure the successful completion of the project within the planned timeline.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Daily Progress Review	Daily	VS Code / Personal Notes	Developer	Review daily development tasks and monitor project progress.
2	Progress Update	Weekly	Google Meet / Email	Developer & Project Guide	Share project progress and receive guidance.
3	Issue / Bug Discussion	As Needed	VS Code / Python Documentation	Developer	Resolve coding and machine learning issues.
4	Stakeholder Review	Bi-Weekly	Google Meet	Developer & Project Guide	Review project milestones and collect feedback.
5	Final Demo Rehearsal	Once	Personal Practice	Developer	Prepare for the final project demonstration.
6	Documentation Review	Weekly	Microsoft Word / GitHub	Developer	Review and finalize project documentation.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Data preprocessing and handling missing values	Performed data cleaning, encoded categorical features, and standardized numerical features before training the models.
2	Selecting the best prediction model	Compared Logistic Regression, Decision Tree, Random Forest, and XGBoost models using evaluation metrics and selected the best-performing model.
3	Integrating the trained model with the web application	Loaded the trained model into the Flask application and validated predictions using real-time user input.
