Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. Individuals applying for credit cards, banks, financial institutions, credit analysts.	6. Limited credit history, incomplete data, low credit score.	5. Manual review, rule-based systems, ML-based systems.
2. Manual approval process, delays, inconsistent decisions, fraud risk.	9. Manual verification, inconsistent evaluation, increasing applications.	7. Applicants expect quick decisions; banks process many applications daily.
3. New application submitted, need for faster approval, high application volume.	10. ML-based Credit Card Approval Prediction system.	8. ONLINE: Bank websites, mobile banking apps, online application portals.
4. Before: Anxiety, uncertainty. After: Confidence, satisfaction.		OFFLINE: Bank branches, financial service centers, customer support representatives.
