

Solution Architecture

Date	2 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Allows users to enter applicant details and view credit card approval predictions.	Flask / HTML / CSS / Jupyter Notebook
API Gateway	Receives user requests and forwards them to the machine learning model for prediction.	Flask
Microservices	Performs data preprocessing, feature engineering, model training, and predicts whether a credit card application is approved or rejected.	Python, pandas, NumPy, scikit-learn
Database	Stores the credit card dataset, trained machine learning model, and prediction results.	CSV Dataset, Pickle (.pkl)
