

No. of Functional Features Included in the Solution

Date	4 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Applicant Data Input	Allows users to enter applicant details through a web-based form.	Frontend (HTML/CSS)	Done	2
2	Data Preprocessing	Cleans, encodes, and scales input data before prediction.	Preprocessing	Done	2
3	Machine Learning Model Training	Trains the model using historical credit card applicant data.	Model Training	Done	3
4	Credit Card Approval Prediction	Predicts whether a credit card application is Approved or Rejected.	Prediction Engine	Done	3
5	Flask Web Application	Provides a web interface for interacting with the prediction system.	Flask Backend	Done	2
6	Input Validation & Error Handling	Validates user inputs and handles invalid or missing data gracefully.	Backend	Done	1
7	Model Integration	Integrates the trained model, scaler, and label encoders with the Flask application.	Backend Integration	Done	1
8	Result Display	Displays the prediction result (Approved ✓ or Rejected ✗) to the user.	Frontend	Done	1

Feature Summary:

Metric	Count / Value
Total Features Planned	10
Total Features Implemented	10
Core / Must-Have Features	8
Additional / Nice-to-Have Features	2
Features Tested & Verified	10

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	3	Applicant Input Form, Result Page, User-Friendly Interface
2	Backend / Logic	4	Flask Backend, Prediction Logic, Error Handling, Input Validation
3	Database / Storage	1	CSV Dataset Storage
4	API / Integration	1	Flask Model Integration
5	Security / Authentication	1	Input Validation and Exception Handling
